

Youth Behavioral Health Services

Our psychiatrist, nurse practitioner, and therapists can provide therapy and medication management for children & youth age 4 and older.

All services are available via telehealth or in-clinic.

THERAPY

Konza Prairie Community Health has licensed behavioral health therapists who can meet the unique needs of each individual with compassionate, personalized care.

Therapy can be an effective treatment for:

- Anxiety & Depression
- ADHD
- Anger & Grief
- Stress & Abuse
- Family Conflicts

MEDICATION MANAGEMENT

Our psychiatrist or psychiatric nurse practitioner can provide medication evaluation and management for children and youth. They collaborate with patients and parents to provide safe and effective use of medication.

KONZA CARE

Konza brings our whole-person care directly to students, making it easier for kids to have access to quality behavioral health services from anywhere – including school, where they spend most of their time.

Does telehealth work for kids?

Yes. Behavioral telehealth works for children age 4 and older. With telehealth, patients can access a virtual visit from a computer or mobile device without leaving school. This type of care reduces travel and time out of school to access mental health services.

How to access care

Simply register for Konza [in-person](#) or [online](#). Our experienced, friendly staff can help answer your questions and make your first appointment. There is no fee to register. We will bill your child's insurance when they receive services.

If your child doesn't have insurance, Konza offers discounted rates based on your income and household size. We can also assist you with Medicaid enrollment if you qualify.

For more information about telehealth services, call 785-238-4711, x. 4000
